Introduction

This publication is a summary of Vital Statistics of the Province of Alberta for 1984 as of September, 1985. Only events which occurred in Alberta are included.

The intent of the Review is primarily for reference, so there is a minimum of analysis and interpretation of the data. It provides a ready reference to some of the more frequently used vital statistics for Alberta.

Tables used in this Review were generated from the Vital Statistics Information Terminal System (VISITS), and I wish to thank my staff for their assistance in compiling this Review.

* Alberta Municipal Affairs Official Population List, 1984.

1 Birthrate is very low in Lloydminster because the hospital is located on the Saskatchewan side of the border. Therefore, births to Alberta residents in hospital are not recorded as Alberta events, but will be included in the Statistics Canada figures when out-of-province events are added. This may also affect the death rates as deaths occurring in the hospital would be recorded in the same manner.

Vital Statistics:	Records dealing with births, deaths, marriages and adoptions: all events which have to do with an individual's entrance into or departure from life, together with changes in civil status.
Live Birth:	A complete expulsion or extraction from the mother, irrespective of the duration of the pregnancy, of a foetus in which, after expulsion or extraction, there is breathing, beating of the heart, pulsation of the umbilical cord or definite movement of a voluntary muscle, whether or not the umbilical cord has been cut or the placenta is attached.
Stillbirth:	Foetal death of at least 20 weeks gestation or 500 grams weight.
Gestation:	Time between the conception and birth of an infant, the usual length being 40 weeks.
Wedlock:	For purpose of this report, in-wedlock means that the parents of the child are married to each other at the time of the birth, or are subsequently married and have changed the birth registration.
Birth Order:	Number of live births to the mother, including this birth.
Infant Death:	Death of a child between birth and one year of age.
Neo-natal Death:	Death of an infant 28 days of age or less.
Natural Increase:	Excess of births minus deaths.
